usda ams 7 cfr part 205 dkt tm 04 07 sunset review

those substances should expire now, not 2007. i do not accept that these substances are "critical" to production and handling of organic products. i see no reason for any exemptions at any time. i believe other substances more conducive to organic can be found for every single substance that is not organic and that is in fact poisonous. no herbicides for clearing roadsides, ditches, rights of way, building perimeters should be tolerated. they pollute water.

NEWSPAPERS SHOULD NEVER BE USED TO FEED ANIMALS. NEVER.
ETHYLENE GAS AS PLANT GROWTH REGULATORS - FOR REGULATION OF PINEAPPLE FLOWERING - THIS IS ABSOLUTELY REVOLTING THAT GAS IS USED TO MAKE THE PLANT FLOURISH. THIS SHOULD NEVER BE DONE. CONSUMER ARE REVOLTED BY THIS KIND OF THING AND IT CANNOT BE HEALTHFUL AT ALL. ETHYLENE SHOULD NEVER BE USED FOR ANY POSTHARVEST RIPENING OF TROPICAL FRUIT AND DEGREENING OF CITRUS. THESE FRUITS MUST RIPEN NORMALLY. WE ARE GETTING FRUITS THESE DAYS THAT TURN BROWN IN ONE DAY BECAUSE OF THIS UNNATURAL PROCESS. THE FRUITS ARE AWFUL.

CONSUMERS HAVE THE RIGHT TO TELL THIS AGENCY WHAT IS WRONG WITH WHAT THEY ARE ALLOWING. THIS AGENCY IS SUPPOSED TO WORK FOR ALL AMERICAN CITIZENS, NOT JUST SCIENTISTS.
